

A Foam Stencil Dabbing Technique with Trendy Colours

v1824

A new and slightly different stencil technique has been applied to this t-shirt. The felt border is secured with pins and used as a stencil and then fabric paint is dabbed onto the stencil.

Comment faire

1 Secure the felt border with pins at the sides.

2 Dab the fabric paint on top of the felt border.

3 Put beautiful felt borders or other interesting items with punched patterns onto the t-shirt. Dab trendy fabric colours on top. Work in colour areas. Remember to put a sheet of plastic inside the shirt whilst working. This activity is for everybody from approx. the age of seven.
