

A small painted and decorated Papier-Mâché Box

v14069

Each of the small papier-mâché boxes with lids are painted with A-Color acrylic metallic paint. When dry they are all decorated with a variation of stickers, feathered down, sequins and rhinestones.

Comment faire

1. Paint the box and the lid separately with A-Color acrylic metallic paint. Leave to dry.

2. A TIP: You may use two colours on the same item and note that drying between application is not necessary.

3. Decorate the box and the lid according to your taste. Use a mix of self-adhesive decorations but also sequins and small polyresin crowns which are glued on using Clear Multi Glue gel.

A TIP! This small box may be used to collect milk teeth so that the tooth fairy knows where to look when she visits.
