

Une étoile faite avec du fil pour fleur et des boules de laine colorées

v14219

Cette étoile est modelée dans du fil pour fleur. Des boules de laine de différentes couleurs sont enfilées sur le fil.

Comment faire

1. Thread the woollen balls onto florist wire. A TIP: Pushing a thick needle through the woollen balls beforehand may make it easier to thread the balls onto the florist wire.

2. Make a twist on the florist wire for every 4 balls, making a star point. See the photo.

3. After the 5th star point, assemble the two ends by twisting the ends together.

4. Insert another piece of florist wire inside the star, along with and in each of the star points. Thread a ball onto the wire between each point ...

5. ... making a ring of balls inside the star.

6. Finish by twisting the two ends together. Attach a piece of leather cord onto the finished star.
