

Une carte avec motifs décorée d'une plume en papier découpée

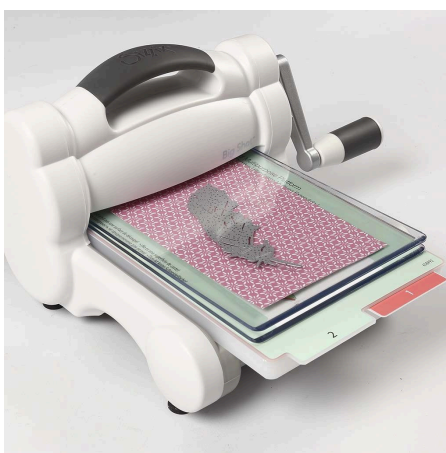

v14591

La face antérieure ornée de motifs, de cette carte de voeux pliée en deux, est décorée d'une plume en papier laquelle est découpée et collée sur un papier glacé. Un morceau de ruban décoratif est collé en travers de la carte. Le tout provient de chez Vivi Gade Design.

Comment faire

1 Tear a piece of glossy paper from the book, trim it to 8 x 12 cm and attach it onto the front of the greeting card using an E-Z Runner.

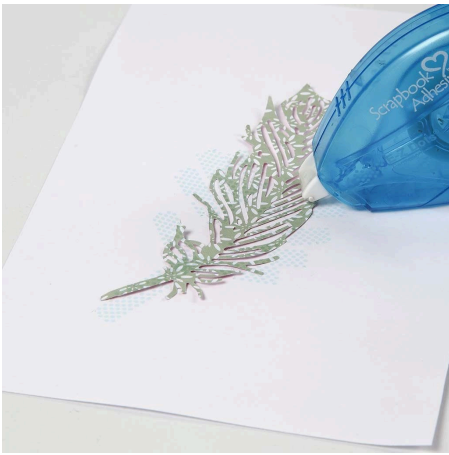

2 Feather/design: Make a 'sandwich' for processing in the Big Shot die-cutting machine. Keep the following order: spacer, acrylic cutting plate, paper, die and another cutting plate. Turn the handle and roll the whole ensemble through the machine.

3 Use the Sizzix rolling brush with a matching foam pad to free the die-cut design from excess paper. Place the die onto the foam pad with the die-cut design at the bottom. Now roll over the brush.

4 Place the design upside down on a piece of paper. Apply glue from the middle towards the edges using an E-Z Runner.

5 Attach the design onto the glossy paper.

6 Tie a piece of decorative ribbon around the greeting card. Finish with a bow and trim.
