

Des oeufs effet marbrés faits avec de l'argile et de la pâte Idea Mix

v14584

Ces oeufs sont modelés en utilisant de l'argile non-cuite mélangée à de la pâte Idea Mix colorée. Ceci leur donne un effet marbré.

Comment faire

1 Roll out the pliable non-firing modelling clay using an acrylic rolling pin. Add 100 g Idea Mix to 1,000 g clay. (Calculate the ratio according to your chosen use).

2 Gather the clay together.

3 Model the clay into an egg shape with your hands. Leave it to dry, for example in an egg box.

4 Sand the egg evenly and smooth using 80 grit sandpaper.

5 Use the back of an old table spoon for polishing the egg to make it shiny.

Another variant White clay with green Idea Mix.
