

L'image d'une poule qui couve ses oeufs

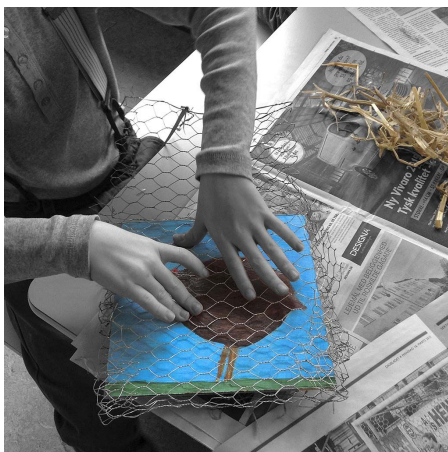

v14475

Après une visite à la ferme et un bon entretien sur la vie dans le poulailler, ces enfants de CM1 ont exposé ensemble des poules peintes sur des nids en raphia et en treillis métallique, en guise de détail supplémentaire devant l'œuvre peinte. Ce projet a stimulé l'intérêt des enfants pour la nature en plus de travailler avec de nouveaux matériaux dans un processus créatif.

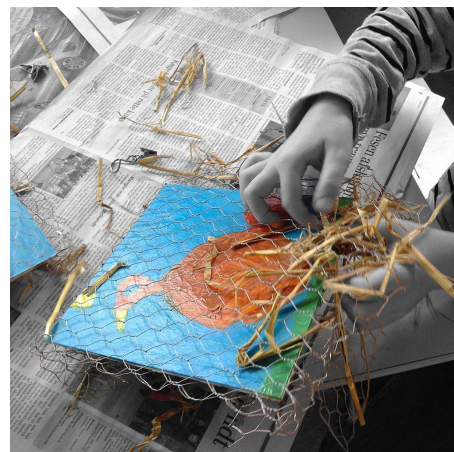

Comment faire

1 Draw the outline of the chicken with a pencil on the canvas panel. Paint with Pigment Art School acrylic paint. Leave to dry.

2 Cut a piece of chicken wire which is larger than the canvas panel. Place the chicken wire over the design and bend it onto the back.

3 Push straw into the chicken wire to create the chicken's nest. A TIP: As an alternative to real straw, you may use natural raffia, cut into small pieces.
