

Un faux microphone amusant

v14436

Un microphone fait en feuilles de mousse EVA à paillettes enroulées et agrafées ensemble, un œuf en polystyrène peint en noir et collé dessus pour la Tête du microphone avec une antenne en fil chenille. Décorez avec des pierres de strass.

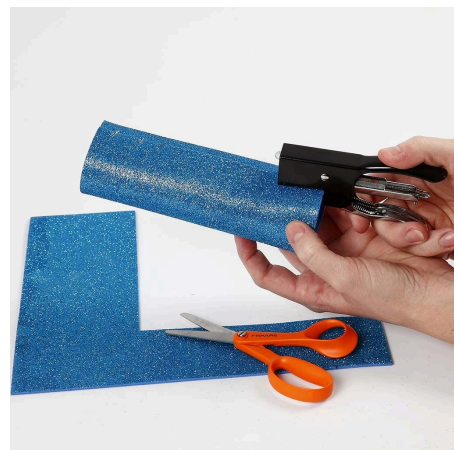

Comment faire

1 Microphone head: Paint a polystyrene egg with black A-Color metallic paint. Leave to dry.

2 Make a hole in the pointy end of the egg with a sharp object. Put glue inside the hole and insert the pipe cleaner for the antenna. Leave to dry.

3 Make the microphone grip from a tube of Foam Rubber with glitter. Adjust the size according to the microphone head and staple together. A TIP: shape the tube like a funnel like on a real microphone and trim.

4 Glue the microphone head and grip together with a glue gun.

5 Decorate with self-adhesive rhinestones according to your imagination.
