

Des œufs peints en doré et décorés avec des pierres de strass

v14434

Peignez la partie supérieure de l'œuf en utilisant une couleur de peinture acrylique Plus Color. Peignez la partie inférieure avec de la peinture dorée Art Metal. Décorez avec des pierres de strass auto-collantes. Fixez un crochet en métal.

Comment faire

1 To help the process, insert a flower stick into the egg. Draw a line around the egg with a marker where the two colours should meet.

2 Apply two coats of Plus Color craft paint in one colour. Allow to dry between each application. Here we have painted the wide part of the egg in one colour and the narrow part with gold. You may vary according to your taste.

3 Paint the other part of the egg with Art Metal gold paint and leave to dry.

4 Decorate with rhinestones according to your taste.

5 You may paint small dots on the egg in a different colour. Use the handle of the brush, dabbing it in Plus Color craft paint. Leave to dry.

6 Insert a metal hanger (a loop with a collar & legs) into the hole of the egg; squeeze the two legs together, push them into the egg and slowly let go. Attach a piece of string to the loop for hanging.
