

## Un petit tapis tissé sur un métier circulaire

v14799

Ce tapis (76 cm de diamètre sans les franges) est tissé avec des couleurs différentes de fil acrylique sur un métier circulaire qui peut être assemblé en trois tailles selon vos besoins.

### *Comment faire*

**1** Click the parts together to assemble the circular loom in the largest of the three possible sizes (88 cm).

**2** Wrap the circular loom with warp threads from acrylic yarn around the grooves. Connect opposite grooves to each other so that the warp threads are double. NB: There are an odd number of warp threads on this circular loom.

**3** Thread the needle with acrylic yarn and weave alternately over and under the warp threads. NB: Here we have woven the yarn doubled over, but it's up to you.

**4** Use the comb to compress the woven section as you go along.

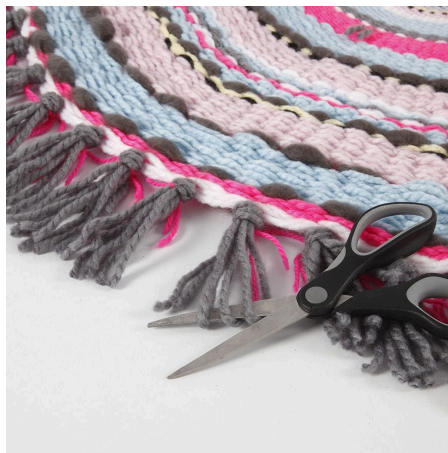

**5** Cut the loom free and tie the warp threads in pairs (with one exception due to the odd number of warp threads).

**6** Tassels: Cut 56 pieces of yarn each measuring 80 cm. Double each piece of yarn over twice to make a bundle of 4 x 20 cm threads.

**7** Place the bundle in the middle of four tied-together warp threads. At each side, the ends of the bundle are pushed back and up through the gathered warp threads. This creates a loop through which all the ends of the bundle are pulled, forming a tassel.

**8** Cut open the tassel.

**9** Trim the warp threads.
