

## Une décoration suspendue lutin de Silk Clay modelée sur du polystyrène

v14773

Ce petit lutin tenant une petite souris est modelé à partir de Silk Clay sur un ovni en polystyrène ovale. Un fil d'or est attaché au sommet pour accrocher.

### *Comment faire*

**1** Cover the oval polystyrene UFO with Silk Clay in different colours for clothes, skin and beard. Model details like arms with hands, eyes, nose, mouth and ears and press on all parts except the arms.

**2** Mouse: Mix black and white Silk Clay to make anthracite grey and model a mouse with a tail and ears. Model a nose and eyes and press on the parts. Attach the arms onto the pixie and place the mouse in his arms. See the main photo!

**3** Cut a piece of gold thread to your chosen length and tie to make a loop. Attach the loop at the top onto the back with a fresh blob of Silk Clay in the same colour as the hat.
