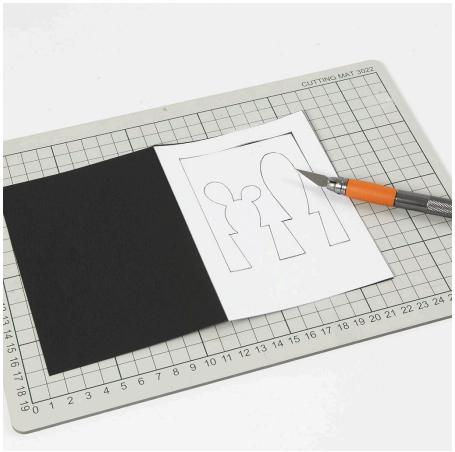
Greeting Cards decorated with a Cutting out and Design Paper

v14728

These greeting cards are decorated in the same style. One has a cut-out of two cacti using a template and a piece of design paper attached onto the inner side of the front of the card. The cacti are decorated with self-adhesive rhinestones. The other greeting card is decorated with a piece of design paper which is cut out using a template and then glued onto the front of the greeting card. Both greeting cards are decorated further with design paper cut-outs (partly with text, partly with text and a design).

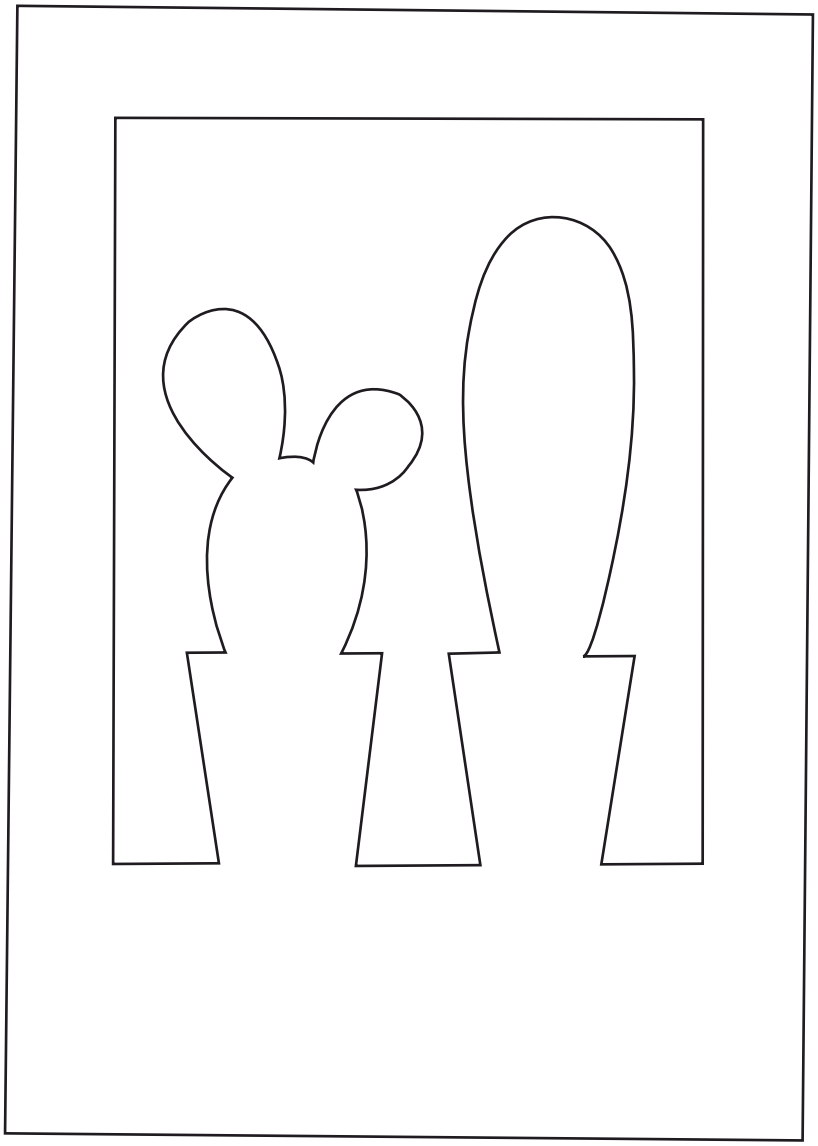
Comment faire



1 A greeting card with a cut-out on the front: Print the template which is available as a separate pdf-file for this idea. Place the template onto the front of the greeting card and cut out through both layers of paper.

2 Cut a piece of design paper to the same size as the front of the greeting card (or slightly smaller) and attach it onto the inside of the greeting card, so that the designs are visible through the cut-out window on the front.

3 Decorate each cactus according to your taste with self-adhesive rhinestones and a design paper cut-out.

4 A greeting card with a collage on the front: Cut a piece of design paper to the same size as the front of the greeting card/ or (like in this example) slightly smaller. Cut out a circle, preferably slightly staggered. You may use the bottom of a glass as a template. Attach the design paper on top of the front of the greeting card together with a cut out design from the design paper.


5 Decorate with another cut out design (preferably smaller) and attach this with a 3D foam pad to give a 3D raised effect.
