

## A Keyring Fob made from wooden Beads on a Cord

v14716

The figure on this fob is made from wooden beads in different designs, threaded onto a waxed, thick cotton cord with a knot at the bottom. Two beads are decorated with markers; the one at the top as a face. The same type of cord (just thinner) is cut into small pieces and tied around the thick cord for hair. Finally a keyring is attached to thick cord.
