

A Christmas Tree with Decoupage and Decorations

v14671

These Christmas trees are covered with decoupage paper. When dry they are decorated with self-adhesive rhinestones and beads. A gold 3D Liner is used for making garlands. Wooden beads are threaded onto a piece of coloured nylon cord which is attached to each of the finished trees.

Comment faire

1 Cut/tear small pieces of decoupage paper.

2 Use a brush to apply decoupage lacquer onto the Christmas tree. Attach the small pieces of decoupage paper to the lacquer, one piece at a time. Use the brush to smooth out each piece of paper from the middle and outwards to all sides. When the Christmas tree is fully covered, apply at least one coat of decoupage lacquer and leave to dry between coats.

3 Decorate with gold 3D Liner and leave to dry. Decorate further with self-adhesive rhinestones/beads according to your own taste. Tie a coloured nylon cord onto the hole at the top, thread on wooden beads and tie a double knot.
