

Un filet fabriqué à partir d'une corde nouée

v14628

Ces bocaux en verre sont suspendus dans un filet décoratif fait en corde pour macramé.

Comment faire

1 Cut 4 cords which are twice as long as your chosen hanger length. Arrange the cords in pairs across each other over the bottom of a glass jar. Fix the cords in place with tape as shown. Tie four knots, marking the diameter of the glass jar. (See photo).

2 Tie reef knots in pairs along the length of the glass jar using the cord on the right and the cord on the left of each of the original four knots, making a net. Finish at the rim of the glass jar and gather all the cords in a knot at the top.
