

Cartes de voeux décorées avec du papier cartonné poinçonné

v14631

Le recto de ces cartes de voeux (fournies avec enveloppes) est décoré d'un morceau de papier cartonné blanc avec un texte imprimé et un dessin poinçonné.

Comment faire

1 Put a piece of card in the printer. Write text and print out. Trim to 6 x 12 cm and make sure that the text is at the top so that there will be enough space for the punched-out design at the bottom. See the next step.

2 Place the piece of card in the paper punch and punch out the design in the middle of the card by pushing down the handle.

3 Attach the double-sided 3D foam pads onto the back of the piece of card. Attach this piece of card onto the front of the greeting card.
