

Des fleurs pompons sur des tiges en fil bonsaï

v14806

Ces bouquets sont faits avec des pompons. Chaque pompon est fait au préalable avec du fil acrylique sur un gabarit pour pompons. Du fil bonsaï souple enroulé de ruban adhésif vert est poussé dans le pompon.

Comment faire

1 Cut a piece of yarn to your chosen length and double it over. This is to be used for tying the pom-pom at the end. Place this doubled-over piece of yarn on the tool as illustrated. Now wind the yarn from the ball approx. 100 times around the widest of the two forks of the tool. (NB: this tool enables you to make pom-poms in two different sizes, dictated by the narrow or wide fork).

2 Tie the doubled-over piece of yarn tightly around the wound bundle of wool.

3 Cut the yarn open on one side of the tool. The tool has a deep groove all the way around to allow room for the blade of the scissors.

4 Tighten the doubled-over piece of yarn again and cut the yarn open on the other side of the tool. Tighten one more time and finish with a couple of double knots.

5 Trim the pom-pom to make it as round as possible. The stalk: Cut a piece of bonsai wire to your chosen length and wrap green florist tape around the wire. Push the finished stalk into the pom-pom.
