

## Dabbing Technique on Porcelain

v15082

If the porcelain product doesn't need to be dishwasher safe after decoration, then A-Color Glass is an obvious choice. This paint is ideal for dabbing on with a foam stencil brush and doesn't need fixing in an oven when dry. The decorated surface can be cleaned with a damp cloth.

### *Comment faire*

**1** Wipe the porcelain prior to decorating to ensure a non-greasy, clean and dry surface. Dab A-Color paint on with a foam stencil brush. You may mix several colours in the same shade and make soft transitions. Leave to dry for 24 hours. You may wipe the surface with a damp cloth.
