

A Metal Star for a Door Decoration decorated with Cones, Lametta etc.

v15027

This metal star is filled with cones, gold lametta, gold cones, spruce and small decorative items. An LED light string and metal wire are wrapped around the star in order to keep the decorations inside.

Comment faire

1 Tie the cones inside the star with brass wire.

2 Wrap the brass wire around one of the sides. When the star is filled with decorations, tie the wire around the star in all directions (in a criss cross fashion) to ensure that the contents don't fall out.

3 Fill inside the star with gold lametta.

4 Glue on cypress cones with a glue gun.

5 Glue artificial cones and other small decorations onto the star with a glue gun.

6 Push spruce into holes and finally wrap brass wire and an LED light string around the star to keep the decorations in place.
