

## A Rocaile Seed Bead Tassel on a Necklace with Rocaile Seed Bead Flowers and Star Spacer Beads

v15322

Make these lovely tassels from rocaile seed beads which can be used as pendants for a necklace. The tassels are made from rocaile seed beads on a jewellery wire with small flowers from rocaile seed beads or with star spacer beads.

### *Comment faire*

**1** Make rocaile seed bead flowers by threading four rocaile seed beads onto a piece of jewellery wire to make a flower wreath and one bead in the middle. Feed the jewellery wire inside the first of the four rocaile seed beads, thread three new beads onto the flower wreath and feed the wire through the last of the four rocaile seed beads just before the middle bead. Tighten.

**2** Secure the jewellery wire by tying a double knot after the flower. Now thread more rocaile seed beads onto the jewellery wire up to where you want the next flower wreath.

**3** When the jewellery wire is the desired length, thread on an end cap. Now thread on a round jump ring and then feed the wire back through the end cap and now continue by threading rocaile seed beads and making flowers on another piece of jewellery wire for the tassel.

**4** You can choose to thread star spacer beads onto the jewellery wire for the tassel instead of rocaille seed bead flowers. Thread an end cap onto both sides of the star spacer bead to prevent the rocaille seed beads from slipping inside the star spacer bead.
