

A Box decorated with Deco Foil

v15238

These white papier-mâché boxes are decorated with deco foil using double-sided foil tape.

Comment faire

1 Cut a piece of double-sided foil tape the same size as the box lid.

2 Remove the protective paper layer on one side of the double-sided foil tape.

3 Attach the sticky side of the double-sided foil tape to the lid, rub it on and remove the other protective layer.

4 Cut a suitable piece of deco foil, place it on top of the lid (i.e. the sticky foil tape) and rub.

5 Carefully pull off the deco foil. If the deco foil has not transferred completely onto the sticky foil tape, just rub on some more deco foil.

6 Cut or punch out some designs from double-sided foil tape.

7 Attach the foil tape designs onto the sides of the box.

8 Rub on the deco foil using the same procedure as on the lid.
