

A Photo transferred onto a Shopping Bag using Transfer Paper

v15208

Decorate a canvas bag with a photo printed onto transfer paper. The transfer paper design is permanent on light cotton. The canvas bag can subsequently be washed inside out at 30°C. Wash the bag separately first time. Test it beforehand if you wish to use transfer paper on other materials.

Comment faire

1 Flip/mirror the design and print it onto a transfer sheet. Use a laser or inkjet printer.

2 Cut the design to the desired shape.

3 Place the design face down onto the fabric. Fix with an iron. Use a cotton setting on the iron and keep the iron moving for approx. 1 minute whilst pressing firmly.

4 Let the transfer sheet cool down completely before you separate it from the backing paper.
