

String Art with Cotton Tube Yarn in hexagonal wooden Frames

v15221

Make string art with cotton tube yarn by winding it around a hexagonal wooden frame. Glue two hexagonal wooden frames onto each side of the woven frame.

Comment faire

1 Start by removing the glass from the frame. Use pliers for removing the metal holding the glass inside the frame.

2 Tie the yarn end onto the hook for hanging.

3 Wind the yarn around the frame in a random pattern.

4 Remove glass and metal from two frames (like in step 1). Use a glue gun to glue a wooden frame onto each side of the frame with the woven cotton tube yarn. You may clamp the frames together whilst the glue is drying.
