Earrings with Rocaille Seed Bead Tassels

v15260

These earrings are simple tassels made from 3 mm rocaille seed beads on jewellery wire attached onto French ear wires.

Comment faire

1 Cut two 5 cm pieces of jewellery wire. Feed the cords through the loop of a French ear wire.

2 Double over the two pieces of jewellery wire at the loop of the ear wire. You now have four 2.5 cm wires. Feed all four wire ends through a crimp bead. Squeeze the crimp bead flat with flat nose pliers.

3 Thread 15 rocaille beads on each of the four pieces of jewellery wire and finish each with a crimp bead, squeezing it flat with flat nose pliers. Trim the excess wire.
