

A Terracotta Tile decorated with Terrazzo Flakes

v15226

This terracotta tile is decorated with terrazzo flakes attached with decoupage lacquer for glass and porcelain.

Comment faire

1 Apply a generous coat of decoupage lacquer and let it penetrate into the porous tile. Immediately apply another coat on top.

2 Sprinkle terrazzo flakes onto the wet decoupage lacquer. Only carefully sprinkle a single thin layer onto the wet lacquer.

3 Pick up individual flakes with the wet brush.

4 Place the individual flakes strategically. Make it look as natural as possible and not too evenly distributed.

5 Apply decoupage lacquer on top. Leave it to dry and apply another coat.

6 For a durable surface, fix the decoupage lacquer in the oven at 130°C for 30 minutes.

7 You may attach self-adhesive silicone dots onto the back. That way the tile will not scratch table tops when laid flat.
