

A Candle Holder and a Storage Jar decorated with Faux Leather Paper Weaving Strips

v15188

This candle holder and storage jar are decorated with faux leather paper weaving strips attached around the jars and joined with rivets and Dodz adhesive dots.

Comment faire

1 The circumference of the candle holder is 24 cm. Cut two 26 cm faux leather paper weaving strips. The extra 2 cm is to make room for a rivet and to make sure the faux leather paper is not too tight around the candle holder.

2 Cut 12 faux leather paper strips each measuring approx. 9 cm from tip to tip. Assemble them with Dodz adhesive dots in the same fashion as illustrated in the photo. The distance between each strip is 4 cm.

3 Measure the circumference of the glass candle holder and put a mark for the holes at both ends of the woven section.

4 Assemble the woven section with rivets and fit it around the glass candle holder.

5 For the storage jar with a handle cut 12 weaving strips each measuring 10 cm and a handle measuring 23 cm. The procedure is the same as the one for the glass candle holder.
