

A knitted Octopus with a Satin Ribbon Bow Tie

v15590

Make an octopus from knitted tube and decorate it with wooden buttons for eyes and a satin ribbon bow tie. The knitted tube is knitted on a knitting mill.

Comment faire

1 Knit approx. 12 meters of knitted tube on a knitting mill, equivalent to approx. One ball of wool.

2 Shape a ball from approx. 25 g polyester stuffing for the octopus's head.

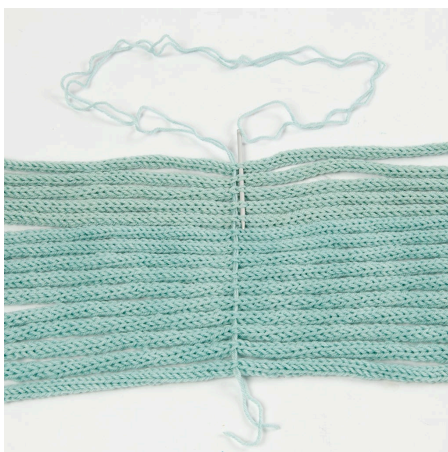

3 Wrap wool around the ball of polyester stuffing until the white polyester stuffing is completely covered. You will need approx. 25 g of wool for an 8 cm diameter ball.

4 Secure the end with a yarn needle.

5 Cut the knitted tube into 15 pieces each measuring approx. 80 cm. Arrange them in a row and sew the pieces of knitted tube together in the same row of stitches ensuring a uniform finish. Start from the middle.

6 Sew a 15 cm section together in the middle. Secure and trim.

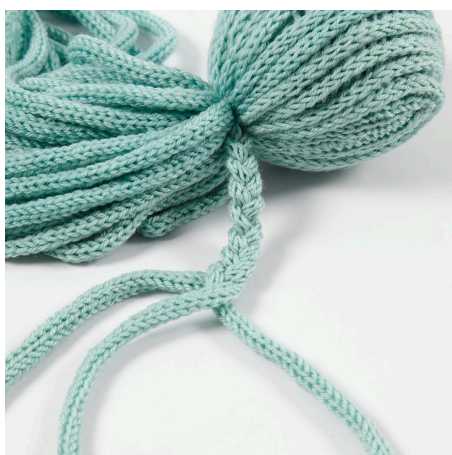

7 Arrange the knitted tube section around the ball and secure with a piece of wool.

8 Sew the knitted tube section together in the sides, covering the ball completely.

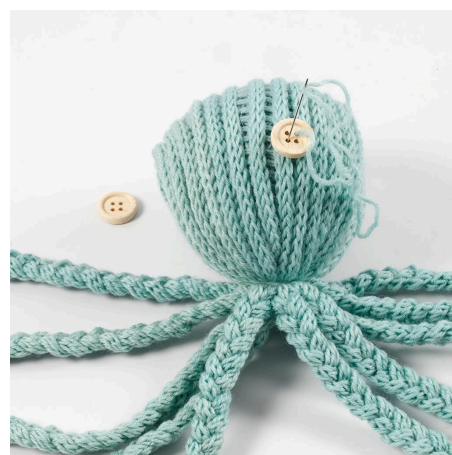

9 Trim the octopus' arms to the same length. Pick up the four stitches at the ends of all of the pieces of knitted tube using a yarn needle. Secure the ends.

10 Plait the octopus's arms.

11 Sew the three ends together with a yarn needle so the plait doesn't unravel.

12 Sew on wooden buttons for the eyes.

13 Tie satin ribbon around the octopus's neck.
