

Christmas Stars from wooden Discs decorated with Glitter Glue

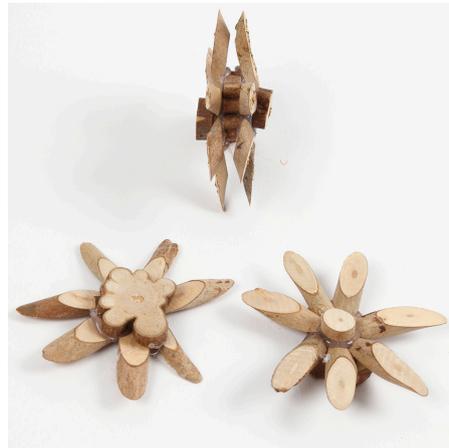

v15545

Glue wooden discs in different shapes together using a glue gun to create a star. Decorate further with glitter glue. These stars look lovely as hanging decorations or as decorations in flower pots.

Comment faire

1 Glue elongated wooden discs onto a round wooden disc in a star shape using a glue gun. You may finish with a small round wooden disc in the middle.

2 Repeat on the other side of the star as illustrated in the picture. Alternatively you may glue two stars together with a small wooden disc in the middle.

3 For hanging: Tie a loop from natural twine and glue the knot onto the star so that it can be used for hanging. For decoration in flower pots: Glue the star onto a wooden stick and push the wooden stick into the flower pot. Further decorate the finished star with glitter glue.
