

A Candle Holder decorated with Craft Paint and mini Glass Beads

v15492

These (classic Swedish) wooden candle holders are painted with craft paint and decorated with mini glass beads mixed with sticky base transparent, self-hardening modelling gel.

Comment faire

1 Paint the candle holder with red craft paint. Apply two coats to cover properly and allow the paint to dry between applications.

2 Mix the mini glass beads with sticky base transparent, self-hardening modelling gel.

3 Attach the mixture onto the candle holder. We have used the two smallest sizes of mini glass beads.
