

A Metal Ring decorated with Bells and Vivi Gade Card Cut-Outs

v15418

This Christmas decoration is made from a metal ring decorated with bells, card cut-outs with different designs and punched-out snowflakes.

Comment faire

1 Place the metal ring on a piece of paper and draw a wavy outline on both sides of the ring, following the curve of the ring. The outline should be approx. 2.5-3 cm wide and max. 15 cm long.

2 Double over the paper and cut out two identical pieces. Glue the pieces around the metal ring as illustrated in the picture.

3 Punch out snowflakes in different sizes from paper in different colours and glue them onto the paper already attached onto the metal ring. Create a 3D effect by only attaching the centre of the snowflakes to the paper and then bend the tips slightly upward. You may attach several snowflakes on top of each other.

4 Attach the card cut-outs between the snowflakes using a glue stick or glue them directly onto the metal ring.

5 Tie a piece of gold thread with a bow at the top of the metal ring for hanging. Tie either bells onto the ends of the thread or glue large card cut-outs onto the thread.
