Papier-mâché Christmas houses for hanging decorated with Foam Clay

v15726

Decorate these papier-mâché houses for hanging with Plus Color craft paint. Once dry, decorate them further with Silk Clay, modelled and attached directly onto the houses.

Comment faire

1 Paint the papier-mâché houses with Plus Color craft paint and leave to dry.

2 Model Foam Clay and push it onto the roof of the house and around the bottom of the house. Roll and attach small Foam Clay snow balls.

3 Model Silk Clay and push it into the indentations on the house for the windows and the door. A tip: if the Silk Clay does not stick completely, dab on a bit of water to use as glue.

4 Roll Silk Clay strips as shown in the photo. Make bars and frames for the windows by attaching the strips inside and around the windows.

5 Attach a bit of Foam Clay around the windows and the door for snow.

6 Model small Silk Clay details and attach them onto the papier-mâché house; here a snowman with a hat and a scarf as well as a door handle on the door.
