

Angels made from straw for hanging

v15751

Make this angel from pieces of straw which are tied together with thread. Attach a pipe cleaner halo and a string for hanging.

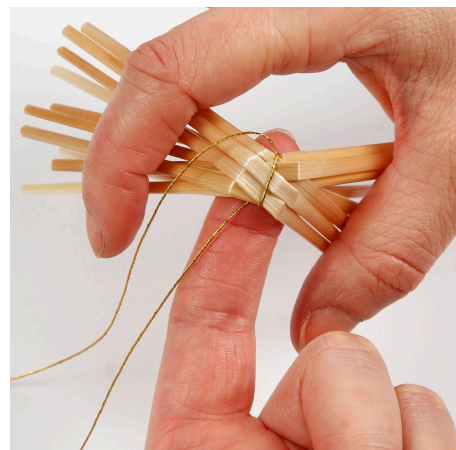

Comment faire

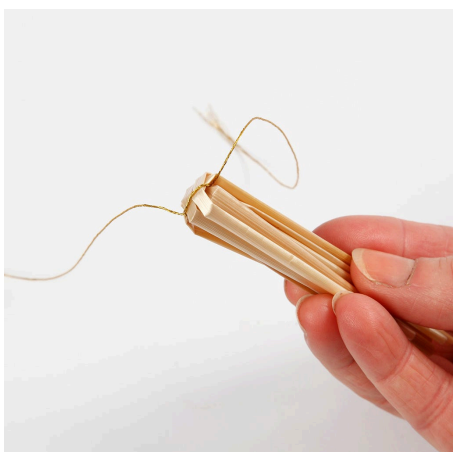

1 Let the straws soak in water for approx. 4 hours.

2 Gather straws in two bundles of ten and tie them together with a piece of thread in the middle.

3 Bend one bundle of straws in the middle over a finger as shown in the photo.

4 Tighten the thread and tie a double knot. Tie the two ends of the thread together with a knot to make a loop for hanging.

5 Place the other bundle of straws for the wings between the doubled-over bundle of straws.

6 Tie thread around the join in a square with a cross as shown in the photo.

7 Trim the straws into an arch shape at the bottom. Trim the wings at an angle with the shortest straw at the bottom.

8 Cut a small piece of pipe cleaner for the halo. Glue it together and thread it onto the doubled-over piece of thread (the loop) for hanging.
