

An invitation from recycled card decorated with a skeleton leaf

v15578

Make your own invitation from recycled card decorated with gold paper and skeleton leaves. Tie a piece of raffia around the invitation and decorate further with rhinestones.

Comment faire

1 Cut a piece of gold paper and a piece of recycled card to fit the front of the greeting card. Cut the recycled card slightly smaller than the gold paper, so that the gold paper creates a frame around the recycled card.

2 Attach the parts onto the front of the greeting card using double-sided adhesive tape.

3 Print the word 'Invitation' onto a sheet of gold paper.

4 Draw a line with the glue pen on the recycled card and attach the skeleton leaf.

5 Trim the piece of paper with the text 'Invitation' (making it into a tag). Punch a hole in the paper, feed a piece of raffia through the hole and tie the raffia around the greeting card.

6 Decorate the leaf with self-adhesive rhinestones.

7 Decorate the inside of the envelope with gold paper. Attach the inlay with double-sided adhesive tape.

8 You may decorate the envelope with gold paper, recycled card and a skeleton leaf.
