# Make trays from faux leather paper decorated with rattan

v15606

Make a lovely and practical tray folded from faux leather paper decorated with rattan.
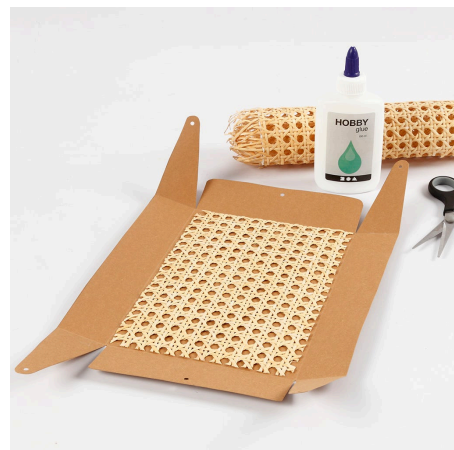

Comment faire

1 Print out the two templates which are available as a separate PDF on this page. Copy the templates onto faux leather paper and cut out. Set the iron at a medium temperature and smooth out the faux leather paper with the iron.

2 Score along the fold lines with a ruler and a large bone folder. Alternatively you may use a craft knife carefully.

3 Cut a 21 x 15 cm piece of rattan and glue it onto the middle of the faux leather paper. Place a heavy object on top until the glue is dry. You may steam iron the rattan, using a medium setting, prior to attaching it onto the faux leather paper.
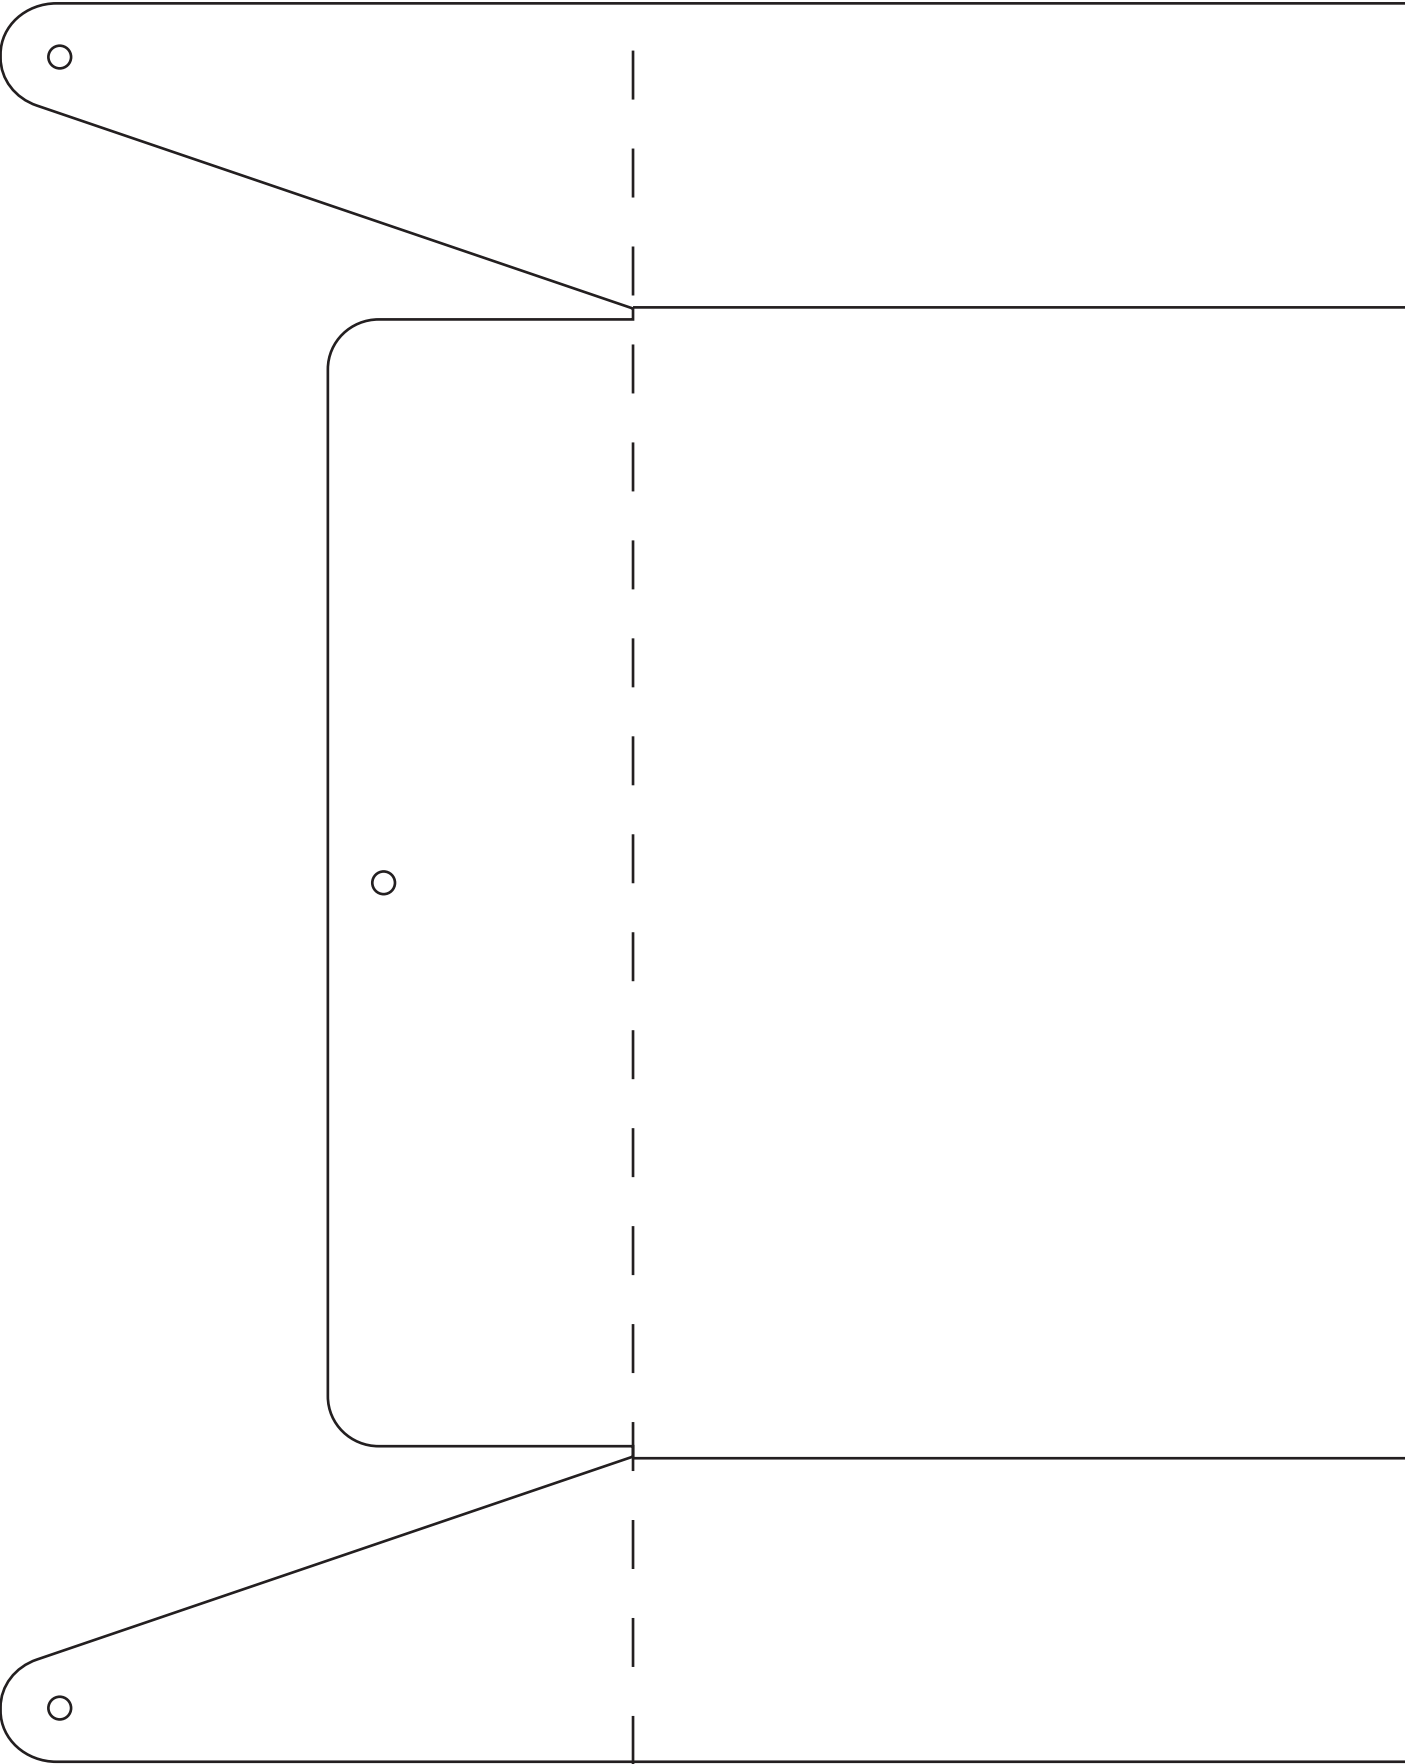

4 Fold the faux leather paper and secure the joints with a rivet and a rivet setting tool.
