

A bamboo chopping board decorated with a pyrography tool

v15626

Make personalised chopping boards from bamboo by writing text and drawing designs with a pyrography tool.

Comment faire

1 Make a rough sketch of your chosen design on a piece of paper. Then copy your design lightly onto the surface of the bamboo using a pencil.

2 Draw designs with the pyrography tool onto the surface with slow movements.

A tip: Use the tip of the pyrography tool to make branded patterns.
