

Ice lollies modelled from Foam Clay XL

v15796

These ice lollies are modelled from Foam Clay size XL on ice lolly sticks.

Comment faire

1 Model the ice lolly parts from Foam Clay XL.

2 Push the parts together gently. Foam Clay sticks to itself as well as to papier-mâché, polystyrene, wood and other absorbent surfaces as long as it is moist.

3 Push a lolly stick into the ice lolly. Leave it to dry for approx. an hour. It is now ready for play.
