

## A forest floor from Silk Clay and natural materials

v15711

Model your very own forest floor from Silk Clay and natural materials. Make hedgehogs, toadstools and acorns.

### *Comment faire*

**1** Model the hedgehog's body from light brown Silk Clay and the eyes and nose from black Silk Clay. Break or cut small pieces of stick, each measuring approx. 1.5-2 cm. Here we have cut a total of approx. 35 small sticks.

**2** Press the eyes and the nose lightly onto the hedgehog and push the small sticks into the hedgehog's body.

**3** Here is the finished hedgehog.

**4** Model the toadstool's cap and the toadstool's spots from Silk Clay.

**5** Push the cap onto a branch and decorate the toadstool's cap with white spots.

**6** Here are the finished toadstools.

**7** Roll the "nuts" for the acorns from Silk Clay and push them into the cup. Silk Clay will stick to wood, papier-mâché etc. as long as it is moist.
