

A polystyrene ball decorated with Sticky Base and sequins

v15784

Make your own Christmas baubles covered with shiny sequins which are attached onto a polystyrene using Sticky Base.

Comment faire

1 Attach Sticky Base onto your chosen area of the polystyrene ball which you want to cover with sequins. A tip: Apply Sticky Base as you go around the ball in order to avoid the Sticky Base drying too quickly.

2 Attach one sequin at the bottom of the polystyrene ball and make a circle around it with more sequins as shown in the photo. Continue attaching the sequins onto the ball in circles until the ball is covered completely.

3 Fit a metal hanger by pushing it into the top of the polystyrene ball.
