

Paint flowers on eggs decorated with watercolours

v15850

Paint with watercolours on lifelike eggs. Paint the eggs with a base colour first and then decorate further by painting flowers and other natural designs onto the egg. Fix at the end with Fixative spray.

Comment faire

1 Decorate the eggs in your chosen watercolours. You may use two matching colours for one egg. Use a water brush with which you can drip water onto the egg as you go along, merging the colours for a beautiful flow.

2 Paint designs with an ordinary brush.

3 Leave the eggs to dry and then fix with Fixative spray.
