

## Easter eggs from papier-mâché pulp with a hole decorated with nesting chicks

v15884

Make your own hanging Easter eggs from papier-mâché pulp. Model the Easter eggs over a balloon which is then deflated, creating hollow eggs. Paint the inside of the eggs and decorate further with Easter chicks in a sisal nest.

### *Comment faire*

**1** Mix the papier-mâché pulp in water in the ratio: 3 parts pulp to 1 part water.

**2** Inflate a balloon slightly smaller than the size you want your finished Easter egg to be.

**3** Cover the balloon with papier-mâché pulp, but leave one section uncovered to create a hole or opening in the egg.

**4** Adjust the opening so that its edge is smooth and even.

**5** Deflate the balloon.

**6** Remove the balloon from the inside of the egg.

**7** Paint the inside of the egg with Plus Color craft paint and leave to dry.

**8** Attach a string for hanging by making a hole in the top of the egg with a needle and feed the string through the hole.

**9** Tie a knot in the string on the inside of the egg.

**10** Make a nest from sisal.

**11** Place the sisal nest inside the egg.

**12** Place Easter chicks in the nest.
