

## A pencil holder from cardboard tubes decorated with craft paint and basic craft materials

v15925

Make a practical pencil holder from toilet rolls or other cardboard tubes decorated with craft paint and other craft materials such as card, pom-poms, pipe cleaners etc. Attach all the parts with Sticky Base so that the children won't have to use a hot glue gun.

### *Comment faire*

**1** Paint the cardboard tubes with craft paint.

**2** Alternatively, cover some of the cardboard tubes with paper or card. Here we have secured the paper around the tube with a blob of Sticky Base.

**3** Decorate the cardboard tubes with self-adhesive googly eyes etc. Make the nose by rolling a small piece of pipe cleaner into a coil. Attach the nose onto the tube with a small blob of Sticky Base.

**4** Make stripes by wrapping pipe cleaners around the tube.

**5** Fold a pipe cleaner in half and attach it onto the inside of the tube with a small blob of Sticky Base.

**6** Attach pom-poms for the ears on these amusing creatures.

**7** Stick the tubes together with blobs of Sticky Base between each tube.

**8** Make the base by attaching Sticky Base around the edges of the tubes. Press the tubes onto a piece of card.

**9** Once the Sticky Base is dry (takes approx. 24 hours), cut around the tubes.

**10** The finished pencil holder ready for use.
