

## Sea creatures painted on stones with markers and decorated with bio glitter

v15918

Paint stones with Plus Color markers and decorate them with bio glitter so that they resemble sea creatures.

### *Comment faire*

**1** Find suitably sized stones. Here we have also used small stones for the sea creatures' fins and tails. Paint and decorate the stones with Plus Color markers.

**2** Use a brush to apply a thin coat of glue onto the stones where you want glitter details. Sprinkle glitter onto the wet glue.
