

Rapeseed wax candles in a glass lantern decorated with dried flowers

v15893

Make your own candles from environmentally friendly rapeseed wax and decorate the glass lantern with decoupage of dried flowers.

Comment faire

1
You will need approx. 225 g rapeseed wax for each glass lantern. Chop it into small pieces.

2
Melt the wax over a water bath. Don't let it boil.

3
Keep the wick in place with a clothes peg and place the peg across the glass lantern as shown in the photo. Pour the melted wax into the candle holder.

4
Leave the wax to set and trim the excess candle wick.

5
Decorate the glass lanterns with dried flowers. Brush a layer of glass decoupage lacquer onto a piece of plastic. A tip: you may use the packaging from the dried flowers.

6
Gently place the leaves in the decoupage lacquer.

7
Carefully apply decoupage lacquer onto the entire leaf using a brush.

8
Decorate the glass lantern with leaves.

9
Apply another coat of decoupage lacquer on top of the leaves.
