

## Des mugs isothermes personnalisés avec des décorations colorées

v16192

With watercolours and silk salt, children are able to create beautiful play of colours and make hand prints or lovely drawings on top. Insert the finished picture as decoration into the transparent part of the insulated mug. This is great, personalised and practical gift idea!

### *Comment faire*

#### **How to do it:**

Cut a 21 x 15.5 cm piece of white card.

#### **2**

Brush the piece of card with water.

#### **3**

Choose a light colour watercolour paint, f.ex. yellow, and paint onto the white piece of card.

#### **4**

Choose three colours which can be mixed with yellow, f.ex. orange, green and red.

#### **5**

Suck up a bit of watercolour paint using a pipette and drip it onto the wet piece of card. Repeat with all three colours.

#### **6**

Sprinkle silk salt onto the wet watercolour paint and leave to dry completely – preferably until the following day.

Brush off the silk salt. The beautiful dots and patterns created by the silk salt in the watercolour will be revealed.

Make a simple drawing with a black marker pen or make a hand print with black acrylic paint – dab on the paint using a foam stencil brush.

Insert the finished picture inside the transparent part of the mug, insert the insulated lining inside and assemble the mug by screwing the parts together.

PLEASE NOTE: Disassemble the mug when washing. Wash the black insulated mug + the lid. Remove the picture when washing the outside transparent mug. Alternatively, you may use a photo, make a beautiful collage or make a drawing for inserting into the transparent part of the insulated mug. Remember to add name and age to the picture – it's always lovely to add this onto the children's pieces of art.
