

Plaster painted vases, pots & tray

v16148

Plus Color craft paint mixed with Cera-Mix standard plaster casting compound sticks to more or less all surfaces without pre-treatment (you don't need to sand). The colours appear matt and chalky on the surface.

Comment faire

1
Use a mixture which sticks to non-absorbent surfaces. Wipe the painted surfaces with a damp cloth once they are dry.

2
Mix Cera-Mix standard plaster casting compound with paint; 10 g paint with 5 g Cera-Mix standard plaster casting compound (i.e. in the ratio 2:1).

3
Only mix small portions to use straight away as the working time is approx. 15 min.

4
Apply an even coat with a wide brush.

5
Go over the painted surfaces to cover the gaps from first time round. You may have to reapply twice. Leave to dry for approx. 2 hours depending on the thickness of the applied paint & plaster mixture.
