

Une décoration à suspendre avec du papier Vivi Gade Design

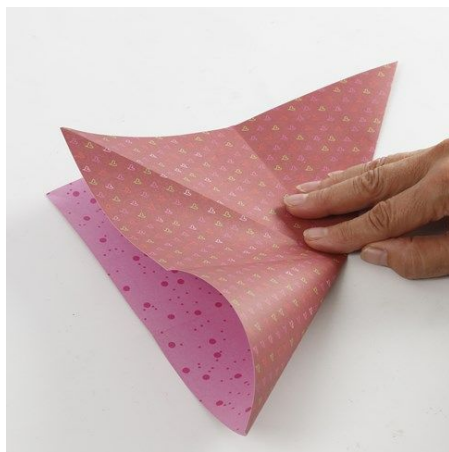

v13958

Une décoration à suspendre faite de deux gros diamants de papier (de respectivement 10 et 16 cm) sur une longue corde de cuir avec des perles en bois sur chacune des extrémités. Chaque diamant de papier est plié et collé en utilisant un morceau carré de papier Vivi Gade Design (de la série Helsinki).

Comment faire

1. Pliez chacun des diamant à partir d'un morceau de papier carré. Utilisez un morceau de papier mesurant 30 x 30cm pour obtenir un diamant de 20cm de large. Utilisez un morceau de papier mesurant 25 x 25cm pour obtenir un diamant de 16cm de large. Pliez les deux côtés du carré en leur milieu puis dépliez. NB: Le papier design a des motifs différents sur chacune de ses faces. Tournez le motif que vous souhaitez utiliser vers le haut comme montré sur l'illustration.

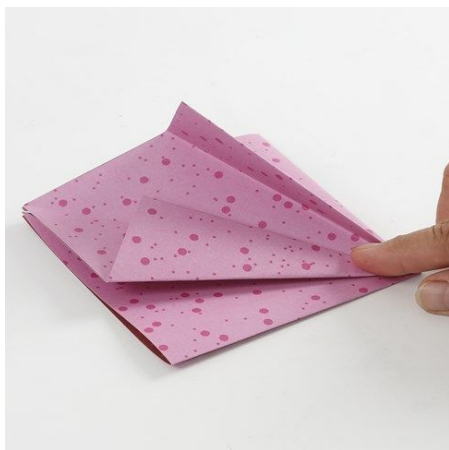

2. Turn the paper over and fold diagonally in both directions. Unfold.

3. In the unfolded piece of paper, where all the folds are now visible, grab the middle horizontal fold from each side of the two 'squares'. Press towards you and a square is formed in the diagonal folds.

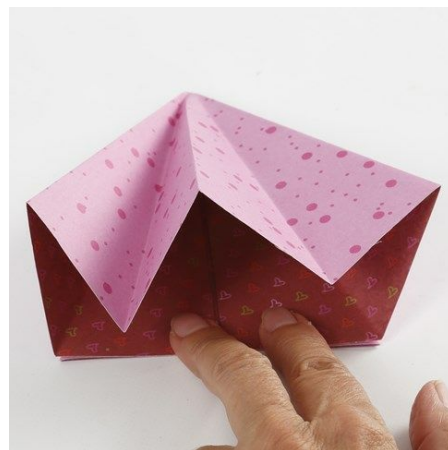

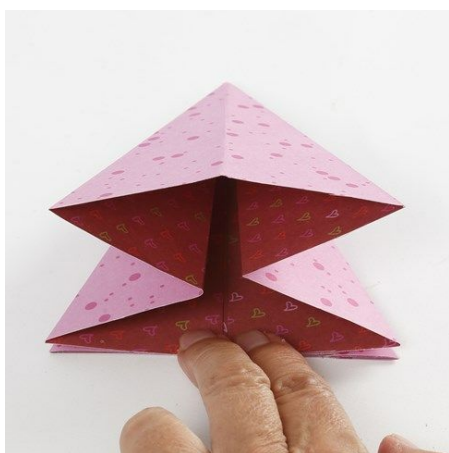

4.
From the tip, which is closed, fold from each side towards the diagonal score line. Turn over and repeat on the other side.

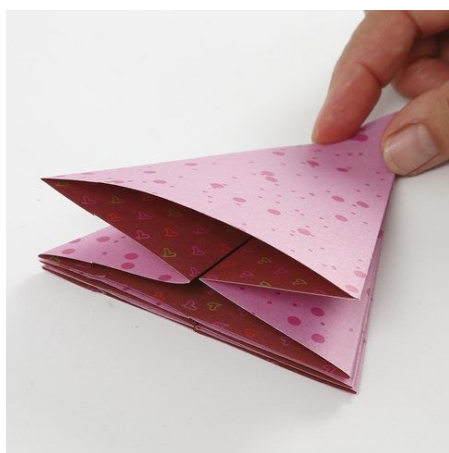

5.
Cut off the end as shown.

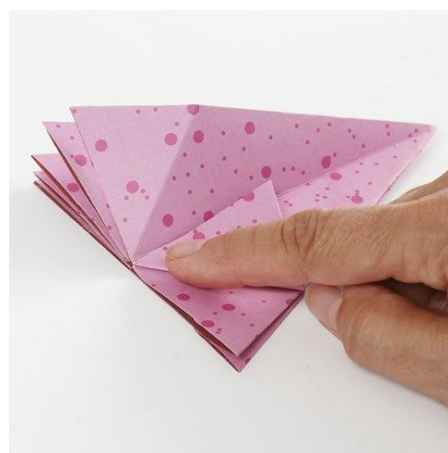

6.
Place the folded triangle flat with the opening facing you. Insert a finger into the tip to keep the whole assembly in order whilst pushing the outer folds in the opposite direction. Turn the triangle over and repeat on the other side.

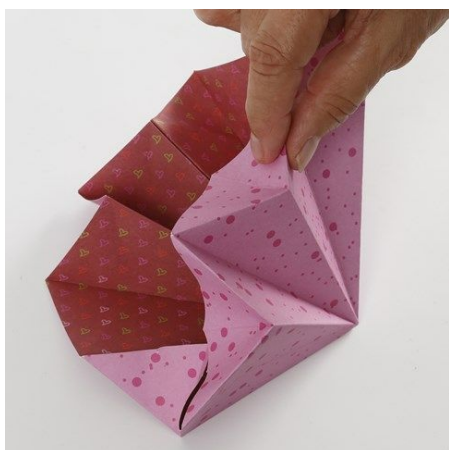

7.
The result of step 6.

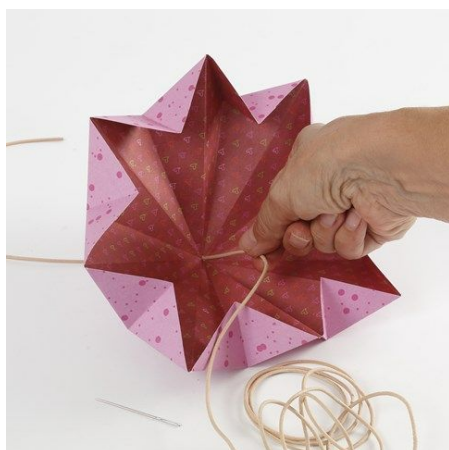

8.
Place the triangle with one of long sides facing you.

9.
Fold the bottom corner towards the score line in the middle. This must be done very accurately. Continue all the way around.

10.
Unfold. For each tip, make a fold backwards and press firmly together.

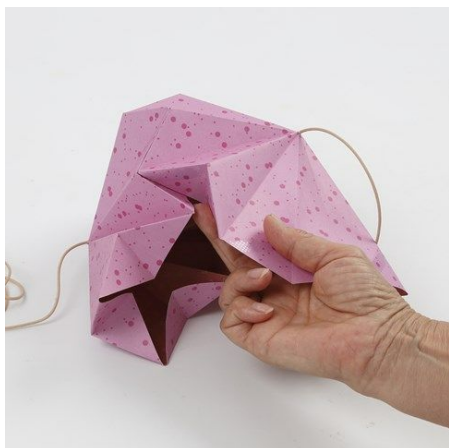

11.
Make a hole in the middle and thread a leather cord through the hole.

12.
Unfold and glue along the inner edge of the outer diamonds as shown. Use E-Z Runner.

13.
Follow step 1-10 and make another part of the paper diamond. Make a hole in the middle and join this with its "twin" on the leather cord.

14.
Thread wooden beads in different sizes (diameter 3.5, 3 and 2cm) onto the leather cord at both ends of the paper diamond(s). Tie a double knot at the bottom and trim.

Another variant
Paper diamonds in three sizes; a hanging with two diamonds and a hanging with one (the smallest). The latter has a width of 10cm and is made from a square piece of paper (15 x 15cm). It is decorated with wooden beads; 2.5, 2 and 1.5cm in diameter.
