

A Dinosaur Drawing on Thick Paper in a Passepartout Frame

v12881

Draw a dinosaur on a piece of thick paper using a template and paint it with A-Color glitter acrylic paint. Then cut it out and glue it onto a piece of patterned Color Bar card and attach it to the passepartout frame.

Comment faire

1. Draw a dinosaur using a template or print the design on a piece of A4 140g drawing paper (most printers can print onto paper this thick).

2. Paint the design with A-Color glitter paint.

3. Cut out the dinosaur.

4. Attach a piece of Color Bar card inside the passepartout frame. Glue the dinosaur onto the Color Bar card, letting the dinosaur protrude onto the passepartout frame.

5. Finally use a liquid metallic marker pen for writing text.
