

Une image en points de croix sur du feutre synthétique avec des trous

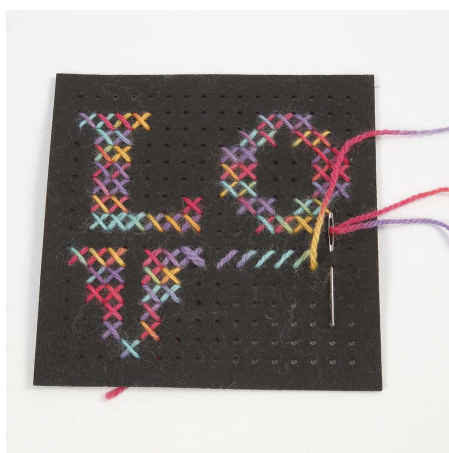

v14311

Ces images sont faites avec des points de croix sur une feuille ou un carré de feutre synthétique avec des trous en utilisant du fil de coton.

Comment faire

1
Use your imagination and draw a design on a piece of squared graph paper. Alternatively you may print the template with instructions on cross-stitch. See the separate PDF file for this idea.

2
Use Maxi cotton yarn and a cross-stitch needle to copy the design with cross-stitch through the holes on the sheet of craft felt.

3
Secure any loose ends on the back.

4
For the frayed border at the bottom: For each hole, double over a piece of yarn (at your chosen length), thread it through the hole and tie with a knot.

5
Finish by trimming the entire frayed border with a pair of scissors.

6
Hang the finished picture in one or two of the holes in the craft felt. Alternatively you may attach a self-adhesive picture hanger to the back of the picture. Even though it is self-adhesive, secure it with a blob of glue.
