

Une couronne de pompons

v14805

Cet anneau en polystyrène est décoré de pompons attachés serrés les uns avec les autres. Chaque pompon est fait avec du fil acrylique sur un outil à pompons.

Comment faire

1
Cut a piece of yarn to your chosen length and double it over. This is to be used for tying the pom-pom at the end. Place this doubled-over piece of yarn on the tool as illustrated. Now wind the yarn from the ball approx. 100 times around the widest of the two forks of the tool. (NB: this tool enables you to make pom-poms in two different sizes, dictated by the narrow or wide fork).

2
Tie the doubled-over piece of yarn tightly around the wound bundle of wool.

3
Cut the yarn open on one side of the tool. The tool has a deep groove all the way around to allow room for the blade of the scissors.

4
Tighten the doubled-over piece of yarn again and cut the yarn open on the other side of the tool. Tighten one more time and finish with a couple of double knots.

5
Trim the pom-pom to make it as round as possible. (Leave two of the long yarn ends for tying and cut off the other two yarn ends).

6
Tie each pom-pom onto the polystyrene ring until it is covered according to your taste.
