

A Cushion Cover made from Pom-poms

v14804

This cushion cover is made from pom-poms tied onto a PVC mesh. Each pom-pom is made from acrylic yarn on a tool for making pom-poms. The mesh is then sewn onto the front of a cushion cover with tacking stitches.

Comment faire

1
Cut the mesh to fit the size of the cushion.

2
Cut a piece of yarn to your chosen length and double it over. This is to be used for tying the pom-pom at the end. Place this doubled-over piece of yarn on the tool as illustrated. Now wind the yarn from the ball approx. 100 times around the widest of the two forks of the tool. (NB: this tool enables you to make pom-poms in two different sizes, dictated by the narrow or wide fork).

3
Tie the doubled-over piece of yarn tightly around the wound bundle of wool.

4
Cut the yarn open on one side of the tool. The tool has a deep groove all the way around to allow room for the blade of the scissors.

5
Tighten the doubled-over piece of yarn again and cut the yarn open on the other side of the tool. Tighten one more time and finish with a couple of double knots.

6
Trim the pom-pom to make it as round as possible. (Leave two of the long yarn ends for tying and cut off the other two yarn ends).

7
Tie each pom-pom onto the mesh using the long yarn ends of the pom-poms.

Another variant

Trim the ends on the back of the mesh of the tied-on pom-poms. Sew the mesh with the compact tied-on pom-poms onto the front of a cushion cover using coarse stitches.
