

The Elf builds a Snowman outside his Front Door

v15400

Make your own Elf's door story about the Elf who builds a snowman or two in front of his Elf's front door. The snowman is made from polystyrene balls covered with Foam Clay and decorated with accessories for snowmen. Leave some snowmen undecorated so that the children can help the Elf decorate them.

Comment faire

1
Roll or press the Foam Clay flat.

2
Cover two polystyrene balls in different sizes with the rolled-out Foam Clay.

3
Assemble the snowman whilst the balls are still sticky. Foam Clay sticks as long as it is not dry.

4
Decorate the snowman with accessories for snowmen; a nose, eyes, buttons and arms.

5
Attach a hat with a small blob of Foam Clay inside the hat. Tie a piece of striped cotton cord around the neck for the scarf.
